# Biochemistry Minor 

Program Directors: Jennifer Palenchar, PhD., James W. Wilson PhD
Office Location: Mendel Science Center Rm. 215
Telephone: (610) 519-4840
[Website]

## About

Biochemistry is an interdisciplinary major requiring comprehensive coursework in both Biology and Chemistry. The biological relevance of chemical concepts is stressed throughout the curriculum.
Students are encouraged to pursue one of the many available research experiences.

## MINOR: Biochemistry (22 credits)

The Biochemistry minor requires 22 credits not including pre-requisite coursework.

## Program Notes:

- Courses that fulfill minor requirements may be used to fulfill other requirements (i.e., primary major, core curriculum, minors, concentrations, or free electives).
- The Biochemistry program offers three mechanisms for participation in research by undergraduate majors. Competitive fellowships for 8-10 weeks of summer research are funded by University, government, or industrial sources. Recipients of these fellowships carry out a research program under the direction of a faculty member. Students may also enroll in research mentored by a faculty member for academic credit during the school year, which fulfills the elective requirement in the relevant department (CHM 4801, 4802, 4803, 4851, 4851 or BIO 6509, 6609). Students may also volunteer in research laboratories. In each case, students should discuss participation in research with Program of Biochemistry faculty members.
- Chemistry courses listed below for the minor may have additional pre-requisite not listed on this page.

| Course | Title | Credits |
| :--- | :--- | :---: |
| BIO 2105 | General Biology I | 4 |
| BIO 3351 | Genetics | 4 |
| BIO 4505 | Molecular Biology | 4 |
| CHM 4603 | Biochem Tech. and Pract. | 1 |
| CHM 4621 | Biochemistry I: Structure | 3 |
| CHM 4622 | Biochemistry II:Metabolism | 3 |
| CHM 4623 | Biochemistry III | 3 |
