

# ECE 1260: EGR Prog and Applic

Introductory C programming - engineering-focused algorithms and program development in C using: elementary data structures, conditional branching, loop control, console and file I/O operations, pseudo-random numbers, functions, strings, arrays, matrices, structures and pointer variables.

**Credits:** 3.0

**Co-Requisites:**

ECE 1261

ECE 1261

**Program:** Electrical and Computer Engineering
