

Math Center in the Learner's Studio

The Math Center in the Learner's Studio is a center for student learning excellence. It offers free peer tutoring in mathematics, primarily with first and second year math classes. It also provides an environment where students can work on group projects, study independently, and use its learning resources. These resources include computers capable of running the mathematical software currently being used in math courses offered at Villanova and a comprehensive collection of review materials which students may use for review or independent learning.

The Center is located in 204 Falvey Library, tel. 610-519-6572.
