To earn an accounting major, students must complete the university core curriculum, the business core curriculum, along with all four required accounting courses plus two accounting elective courses. A major in Accounting leads to a degree of Bachelor of Business Administration.

The requirements for becoming a certified public accountant (CPA) differ by state but most include completing 150 credit hours in an accounting program at a college/university, passing the Uniform CPA Exam, and obtaining a specific amount of professional work experience. Today, most professional accounting firms require the completion of 150 credit hours prior to employment.

Many students earn their 150 credit hours by completing both an undergraduate and graduate degree; our two accounting graduate degrees include the Master of Accounting with Data Analytics (MAC) and Master of Business Taxation with Data Analytics (MBT). Students can earn both degrees over the course of four, four and a half, or five years. Alternatively, some students fulfill the 150 credit hours by overloading classes as undergraduates during the fall and spring semesters and/or by taking summer classes. Please contact your academic advisor and/or the accounting department for more information and guidance on earning 150 credit hours.

Program: [Business](#)

Type: Bachelor of Business Administration
